

CORIOLISS

WIDE

This straightener is designed with wider plates to work easily with thicker hair. It is a fantastic tool among the standard salon products because it allows you to straighten any type of hair.

Why is it different?

Because of the extra large size of its plates and because it has an LED temperature display that indicates the different possible heat settings. Each range is shown with a different colour starting from 130°-230°.

What can I use it for?

It is ideal for quick and easy straightening of thick hair. It is also a favourite of many professionals when working on medium to long hair or enhancing any keratin treatment.
